Wäre das Sudoku leer, dann gäbe es

sechs Trilliarden

sechshundertsiebzig Trillionen

neunhundertunddrei Billiarden

siebenhundertzweiundfünfzig Billionen

einundzwanzig Milliarden

zweiundsiebzig Millionen

neunhundertsechsunndreißigtausend

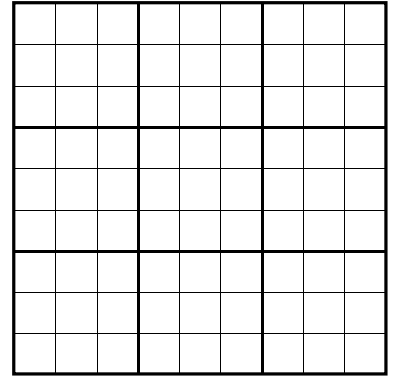

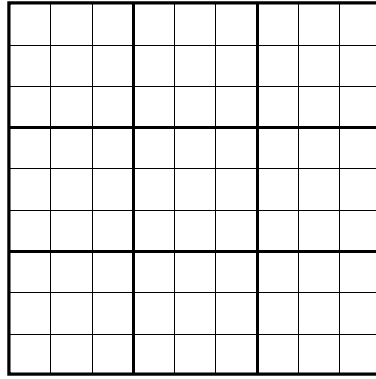

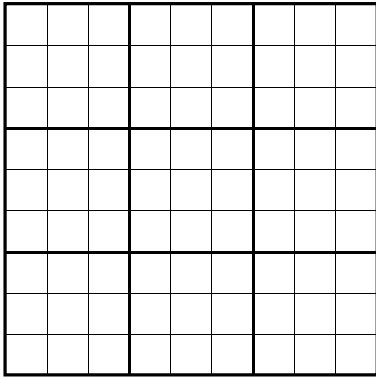

neunhundertsechzig mögliche Lösungen (in Ziffern: 6.670.903.752.021.072.936.960).

Aber es sind schon Ziffern vorhanden. Jetzt gibt es nur noch eine einzige Lösung.

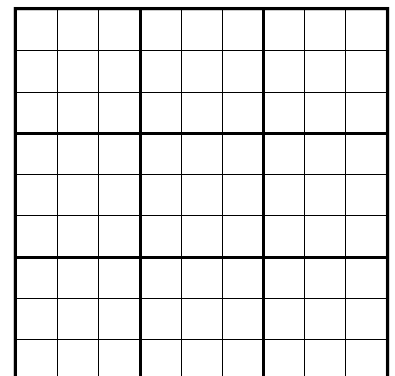

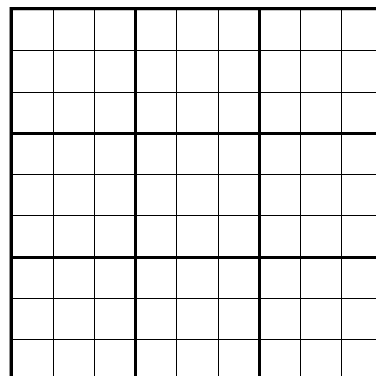

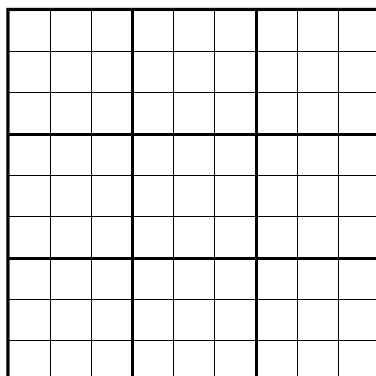

Viel Vergnügen!
